

Metric Head

T JOETOOLS

The choice for a broad range of single layer applications that require metric standards, the Metric Head offers years of proven performance and is an industry standard among fixed center crossheads. Its condensed design reduces set-up time and brings a high level of operational efficiency, reliability and exceptional value to extrusion processors worldwide.

Design: Single Layer (and Skin Layer option), Fixed Center design

Features: Utilizes tapered tooling with metric standards and specifications

Benefits: Proven performance worldwide with operational efficiency and reliability

Sizes: 4mm and up

Striping: Striping options available
