

# RN Head

## **T** JOETOOLS

The RN Head is a single layer crosshead, designed specifically for extruding fine wire products. From telecommunications to electronics the RN Head offers the ease of a fixed center design with a precision, high flow balance for greater concentricity in wire extrusions from 2mm to 5mm. And with better control, the RN Head consistently delivers successful results with greater productivity and minimal scrap.

**Design:** Single Layer, Fixed Center

**Features:** Fixed Center design specifically for fine wire extrusion

**Benefits:** Offers excellent concentricity for fine wire applications including telecommunications and electronics

**Sizes:** 2mm to 5mm

**Striping:** Striping options available
