

Scooter Head

J JOETOOLS

The JoeTools Scooter™ Head offers excellence in co-extrusion processing with minimal costs. Its unique single-secondary layer design allows the Scooter Head to attach to your existing single-layer primary head, converting it to a co-extrusion crosshead. This economical alternative for dual layer applications produces excellent results and is an ideal solution for co-extruding PVC/nylon, regrind/virgin materials, skin layers, among others.

Design: A Single, Secondary Layer, Fixed Center Head, connects to primary head

Features: Designed to attach to a primary head, converting it to a co-extrusion head

Benefits: Economical, converting a single layer head to a dual layer with minimal costs

Sizes: 9/32" and up

Striping: Striping options available
