

# Snap Head

## **J** JOETOOLS

The Snap Head is a master performer in nylon extrusion. Its fixed centered, utilitarian design uses Snap tooling, which makes set-up simple and easy. And with its smooth, efficient operation, the Snap Head is ideal for nylon applications in wire and cable jacketing, requiring a consistent balanced flow that produces high clarity, adhesion and strength.

**Design:** Single Layer, Fixed Center

**Features:** A Utilitarian, Fixed Center Design that uses Snap Tooling

**Benefits:** Ease of set up and operation, offers exceptional performance in nylon applications that include wire jacketing

**Sizes:** 9/32" and up

**Striping:** Striping options available
